

# INTERSTELLARS

FIRST COMPOUND GAIN DeFi MODEL

NATURALLY DEFLATIONARY INSS TOKEN

# REDEFINE DeFi

INTERSTELLARS

01

# WHAT IS INTERSTELLARS

The INTERSTELLARS smart contract provide everyone with a **community based compound gain support fund**, fully based on the Ethereum blockchain and self executed with the programmed protocol.

All the participants stake ETHs towards the INTERSTELLARS community fund will be rewarded with **daily profits** and **INSS token**. Fairness, transparency and justice is insured for all community members according to the code algorithm.

The code is **open source** and can be **verified** by all the programmers. INTERSTELLARS is immutable, scam proof, fair game for everyone and has full transparency.

The rules in INTERSTELLARS are designed to guarantee the **sustainability** of our community fund, ensuring this is a **long play games**. And the ones contributed the most to our community will get most paid.

LET'S REDEFINE DeFi ! HERE WE COME!

SMART CONTRACT ADDRESS:

INSS TOKEN ADDRESS:

# WHAT IS SMART CONTRACT

A smart contract is a **computer program** or a **transaction protocol** which is intended to automatically execute, control or document legally relevant events and actions according to the terms of a contract or an agreement.

The objectives of smart contracts are **the reduction of need** in trusted intermediators, arbitrations and enforcement costs, fraud losses, as well as the reduction of malicious and accidental exceptions. Thus, it is **immutable, scam proof, fairness, and full transparency**.

When the smart contract is **deployed and verified** on blockchain, it runs automatically and no one can ever be able to stop or shut down the system and no one can be banned from the program. It is fully decentralized and transparent.

Everyone can talk to the smart contract **directly through blockchain** without using the interface.

03

# Why INTERSTELLARS ?

INTERSTELLARS is the first DeFi model with compound gain and unique mining mechanism. Community member will have two type of gains while staking ETH in INTERSTELLARS.

1. Minted INSS token to your wallet while staking, which is naturally deflationary token with limited total supply of 100 000.
2. Total 250% ROI gain can be received in 6 different ways (2 passive and 4 through marketing)

The token release mechanism and the optimized design will ensure the full decentralization and the sustainability of INTERSTELLARS platform.

04

# What is INSS token?

INSS is the core token in INTERSTELLARS ECO system. INSS is a fully decentralized token (total supply of 100 000), it is dependent on the staking amount and pool that you have chosen.

After mining 20 000 INSS tokens, inss.finance will connect ETH/INSS balancer pool and mining pool will be opened.

After mining 30 000 INSS tokens, INSS will be on Uniswap and ETH/INSS liquidity will be provided.

After mining 50 000 INSS tokens, INSS will search the possibility to be listed on CEX like Coinbase, huobi and Okex, etc

**NOTE:** To make sure the long term development of INTERSTELLARS, the dev team will reserve 5% token for the dev fund (5000 INSS, will linearly release with the mining process). The fund will be used for future development (new pool development and UI design) and to provide liquidity in inss.finance platform.

05

# What is INSS release mechanism?

There were 6 different staking pool and the daily ROI varied from 1% to 1.5% with different withdraw frequency. There were staking round, which will limited the maximum ETH you can stake in each round. You can only stake once per cycle and you can only redeposit after your 250% ROI.

When you have participated staking, the mined INSS token is defined as **your staking amount \* staking boost (B) \* mining difficulty impactor factor (K)**. K is defined as the mining difficulty impactor factor and k is linearly decreased with mined tokens. K will reduce 0.00001 for every mined token. The staking boost (B) is dependent on the staking pool that you have chosen. For example, if current mining difficulty is 0.99 and you want to stake 1 ETH in pool B, thus, you will receive around  $0.99 * 1 * 1.1 = 1.089$ . That means less and less token can be mined with every ETH staking.

For the first cycle of staking, there is a limit of maximum 20 ETH staking. This will ensure the token will be fully decentralized.

The overall mechanism will ensure the INSS token is totally decentralized and deflation.

06

# What is the staking reward?

By staking ETH to INTERSTELLARS, according to the staking pool that you have chosen, you will receive the first daily return after 24 hours. All the people can receive maximum 250% of your staking from the community in every round.

The 250% ROI can be received in 6 different ways (2 passive and 4 from marketing). When the 250% ROI reaches, a new staking must be made equal or greater to activate a new 250% ROI limit in order to continue receiving the fund.

1. 1-1.5% daily income on your staking (based on the pool) 100% passive to all community members.
2. Lucky star, the one's staking is equal or crossing the integral of 1000 ETH, will get lucky bonus.
3. 7% Direct referral commission and 3% Second level referral commission for growing our community.
4. 10 levels Matching bonus on partners daily ROI
5. Daily top 8 sponsor pool, 5% of ALL deposit to the pool
6. Super bonus for direct referral ETH volume is 100 ETH (3 ETH bonus) , excluded from the limit of 250%

07

# Daily ROI reward on staking

To better decentralized the community fund, there is a limit in every staking round. 1-1.5% of the daily amount are accrued daily to all users based on the staking pool you have chosen until the maximum 250% ROI is reached. The difference between the staking pool is the withdraw frequency, which indicate your loyalty and trust to the community. The more trust you put in the system, the more reward you will receive. At the meantime, you can protect our fund and reduce the gas fee cost.

Round 1  $\leq$  20 ETH

Round 2  $\leq$  40 ETH

Round 3  $\leq$  80 ETH

Round 4  $\leq$  160 ETH

08

# Direct Commission

Awarded to the sponsor when a direct partner or a second level partner makes a staking or restaking. 7% of the staked amount goes to the direct sponsor and 3% goes to the indirect sponsor.

i.e. direct partner stakes 10 ETH, you receive 0.7 ETH as instant commission and your sponsor receives 0.3 ETH as instant commission.

\* All commissions apply 2.5x limit rules and you need at least 3 direct referrals in order to receive second level commissions.

09

# Matching Commission

The matching commission is based upon your partners daily accrual. The matching is awarded every time a downline partner makes a withdrawal of the daily accrual.

**NOTE:** The level of your matching is based upon your direct partners number. One level added for each direct referral.

Levels	Min Directs referrals	Matching bonus
1	1	20%
2	2	10%
3	3	7%
4	4	7%
5	5	7%
6	6	3%
7	7	3%
8	8	3%
9	9	3%
10	10	3%

10

# Top 8 sponsor bonus

5% of all the deposits to INTERSTELLARS is added to the daily TOP 8 bonus pool.

10% of this pool is awarded to the TOP 8 SPONSORS based on direct referral volume every day.

The remaining 90% is then rolled over into the next day's pool to continue to increase the rewards.

Sponsor rank	Allocation of pool
1 <sup>st</sup>	40%
2 <sup>nd</sup>	20%
3 <sup>rd</sup>	12%
4 <sup>th</sup>	8%
5 <sup>th</sup>	5%
6 <sup>th</sup>	5%
7 <sup>th</sup>	5%
8 <sup>th</sup>	5%

?

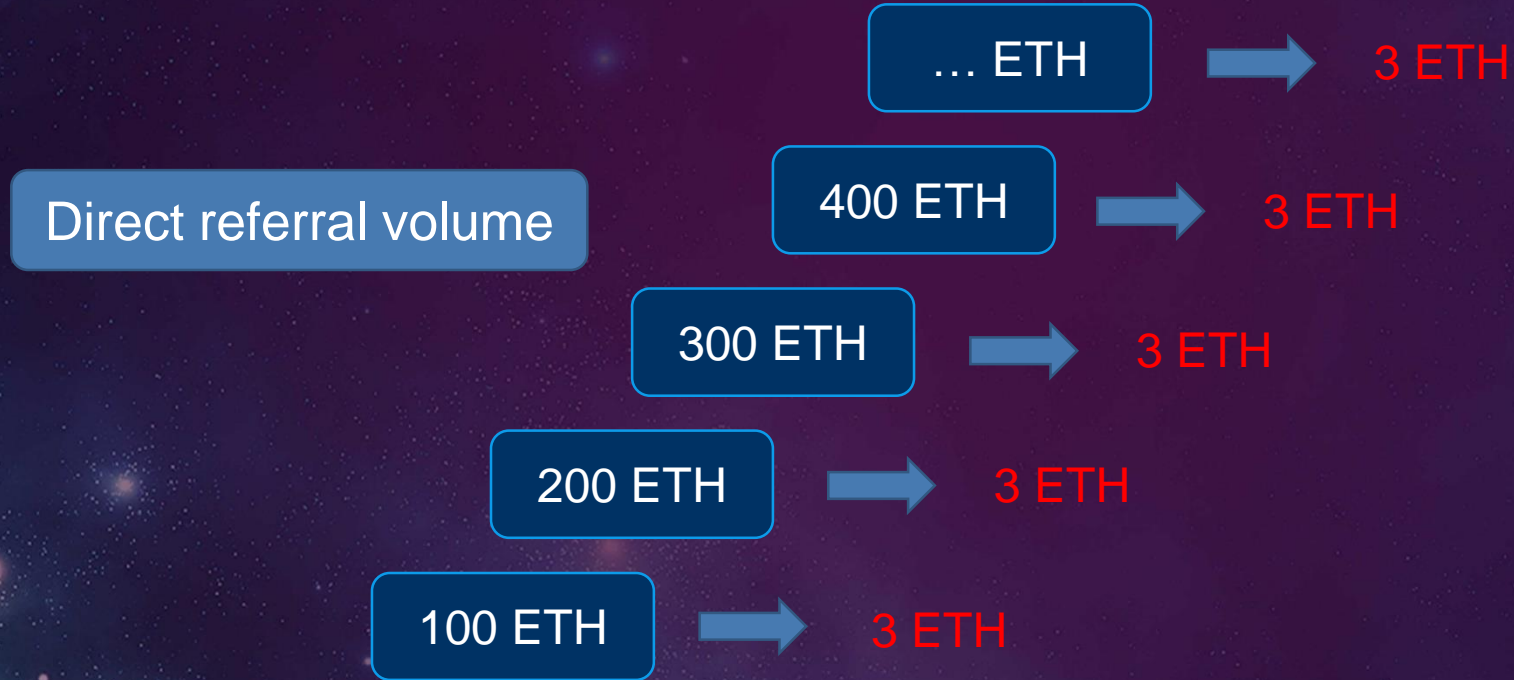

11

# Super bonus – sponsor milestone

3 ETH super bonus will be allocated for every 100 ETH direct referral volume.

**NOTE: This bonus is excluded of 250% limit**

12

# Lucky Star

  
**Lucky star**

In order to celebrate every milestone that our community will achieve, 2% of total staking are allocated to lucky pool. The one crossing or equal to the smart contract balance of integral of 1000 ETH will gain 50% of the lucky pool. For example, if no one withdraw before 1000 ETH, the lucky pool will accumulate 20 ETH and the one surpassing 1000 ETH will get 10 ETH directly, however, this bonus apply towards 2.5x limit. If you deposit is 1 ETH, thus you can instantly get 2.5 ETH instead of 10 ETH. You need to redeposit to continue receiving benefit.

## Milestone

1000 ETH

2000 ETH

... ETH

  
To the moon

**Remember to celebrate milestones  
as you prepare for the road ahead.**

The background of the slide is a deep blue space scene. In the top left, a planet with a bright ring system is visible. In the bottom right, another planet is shown with a bright light source behind it, creating a lens flare. In the top right corner, there is a glowing blue molecular or network structure. The overall aesthetic is futuristic and high-tech.

12

# Vision and plans

Bring truly and fully decentralized finance system to all the community members. You might have missed the bullrun of BTC or DeFi king YFI, never missed INTERSTELLARS. This is an excellent gate way to your financial freedom.

In the near future, INTERSTELLARS team will prepare inss.fianance and inssswap decentralized exchange. The liquidity mining pool will be launched when there are enough INSS tokens are mined.
